

Control and combiner cabinet

- The bus cabinet is the dc side bus control unit of the energy storage battery system, which is connected with the high voltage box and storage.
- Intermediate unit capable of converter; The power pool system (stack) is installed in the bus cabinet.
- Switch off/circuit breaker (optional), three-level BMS (ESMU), and UPS power supply. Confluence ark.
- The electrical characteristics, heat dissipation performance and safety performance of each component have been fully considered in the design.
- And operation and maintenance, reasonable space layout, with compact structure, flexible configuration, security.
- Full reliability and other characteristics. Three stage BMS module (ESMU) in the bus cabinet, with CAN,RS-485, RJ45 Ethernet communication interface, can be realized with high voltage box, PCS/UPS or The communication function between EMS realizes the data communication and control of the energy storage battery management system and protection.
